SERVICE DATE POSTPONED TO 23 JULY 2009

24, June 2009. Enhanced pirate activity delays SEACOM ready for service date. According to Internet Solutions (IS), the paradigm in the South African broadband market is changing, with the commercial principles behind Internet connectivity.

Majority African owned

South African companies will own half of the private equity funded Seacom undersea fibre-optic cable, with total African ownership of the cable to reach 75%

Vox targets growth [\(read more...\)](#)

Having grown through a combination of organic growth and acquisitions over the past five years, Vox Telecom is now bundling **voice** and data services, as well as innovating to help customers reduce their telecom spend during the economic crisis. Chairman Tony van Marken says the company will offer **converged** solutions to help deliver savings and value to its customers, which includes 18 500 corporate customers and 150 000 consumers. He says Vox is offering an alternate value proposition to customers who can choose to avoid the incumbent operator. Currently, Vox is not in an acquisitive mode, but is optimising its operations and getting maximum benefiting from its **network** assets to benefit customers.

SAFARICOM launches Kenya's first mobile internet portal

MICROSOFT has announced the winners and finalists of its 2009 Microsoft Partner of the Year Awards, which honor Microsoft-Registered, Certified and Gold-Certified partners for delivering exemplary solutions for their customers during the past year. [\(read more...\)](#)

Cheers,
Johan Greeff
